WAVES SOLUTION

The waves platform, gives us the opportunity to generate a token belonging to the Waves platform, which gives us the possibility to perform a POSL, and integrate the wallets and the explorer in its Blockchain.

This is the most convenient solution, due to the large business agreements they have, how Deloitte, the leading international audit.

In addition, starting in June, the project can be converted to Ethereum, that is, it can have the two networks, Ethereum and Waves, automatically and use the two blockchains.

An extra, very interesting, is the introduction of the currency to the Exchange Waves, and in this way the currency can be commercialized instantly.

INFORMATION REQUIRED BY THE CLIENT

WEBSITE & WHITE PAPER

To develop the website and the white paper in a way that suits the needs of the client, we will need it.

- **Information about the project**, (how it is born, what you want to solve, what it contributes, team information, roadmap).
- **What the currency contributes** (name, amount, ticker, utility, how the supply will be distributed)

WE NEED TO HAVE IN CONSIDERATION

LAUNCH

SCHEDULE

2-3 DAYS COIN CREATION AND TEST

2-3 DAYS WHITE PAPER

1-2 DAYS WEBSITE

1 DAYS WALLET & EXPLORER
