## SUMMARY

**Universso was born with the firm intention of being a token of global utility.**  
With a new Blockchain model, **the atomic Swap.**

Universso is committed to this model, which is going to become in the next months, in the model reference of the Blockchain and the cryptocurrencies.

Universso token will have a maximum **supply of 100 million tokens.**

And your wallets and explorer will be integrated into the Waves network.

Another advantage of our token, due to the partnerships of our Blockchain provider, is the **audit of all tokens by Deloitte**, a leading international company in management and auditing of high-level technological and business projects.

Without explicit permission, no person has the right to use, reproduce or distribute any material in this technical document for non-commercial and educational purposes, provided that the source and the corresponding copyright notice are cited.

## BUSINESS REVIEW

### MISSION

Give alternatives to all the Blockchain and Cryptocurrency supporters with a new model.

### VISION

Set up the ways to swap between blockchains avoiding extra costs, and making easy the access to Blockchain and Cryptocurrencies.

## DISCLAIMER

This White Paper is intended for distribution solely for information purposes. UNIVERSSO does not guarantee the accuracy of the conclusions and statements reached in this white paper. Moreover, this white paper is provided "as is" with no representations and warranties, express or implied, whatsoever, including, but not limited to: (i) warranties of merchantability, fitness for a particular purpose, title or non infringement; (ii) that the contents of this white paper are free from error or suitable for any purpose; and (iii) that such contents will not infringe third-party rights. # WHAT UNIVERSSO OFFERS

# ATOMIC SWAP WAVES & ETHEREUM

**Atomic swap is the realization of the connection between two Blockchains of different origin.**

Thanks to this model we obtain the "double factor confirmation," using which our currency derives benefits from the two networks.

## How It Works

It works by generating a hash time-locked-contract, which uses multi-signature address and time locks to safely lock in the transaction at an agreed upon price.

Let's say in theory Marc wants to trade Waves with Jhon for Ethereum. Both people would submit a trade, let's say 5 Waves for 1 Ethereum, on both respective blockchains.

But Marc would only be able to receive the Ethereum after he provided a secret code, which only he knows. Once Marc uses the number to receive the Ethereum, Jhon will be able to use the same code to instantly receive the appropriate amount of Waves.

The link between the two transactions would be this secret code. The transaction will only go through once the same code has been entered and the correct number of respective coins have been submitted.

If one party does not send the correct amount of currency or does not enter the code, the transaction will not go through, and each party will be returned their coins. This will in effect truly remove the need for a third party.

## POSL WAVES TOKEN

Waves utilizes the unique Leased Proof of Stake system for verifying transactions. Simply put, this allows you to safely and securely “lease” your Waves to nodes in return earning fees from processed transactions.

This is like mining but without the need to run your computer or maintain any kind of node! You lease (any amount even 1 single Wave) then you can just turn off your computer and let the fees collect in your wallet. Miner Reward tokens are also being distributed to leasers for a limited time, which will eventually be used to vote on major network changes with regards to maintaining the network.

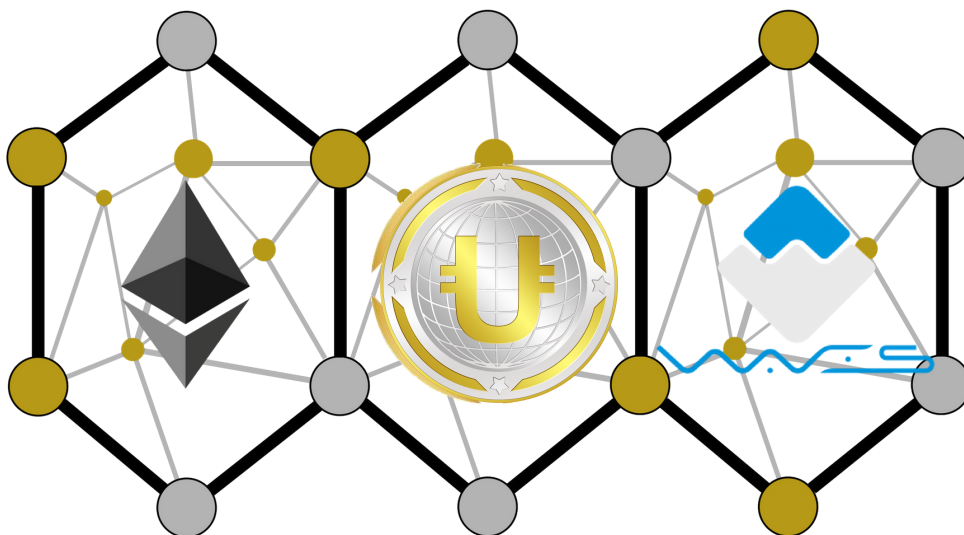

## DELOITTE AGREEMENT & SUPERVISSION

Notably, Deloitte will also look toward developing a legal framework for the regulation of ICO and new token creation projects. The lack of any legal mechanisms, Deloitte contends, leaves companies open to 'project risks and challenges' after an ICO.

"Blockchain technologies are gaining ground, already allowing start-ups, investors and other stakeholders to quickly raise significant funds in cryptocurrencies," stated Artem Tolkachev, director of legal services for technology projects at Deloitte CIS.

"However, the cryptocurrency market is relatively young, and not all the regulatory mechanisms are in place."

# Deloitte.

## AIRDROPS

Universso can make airdrops to the first coin adopters. Thanks to their Blockchain network based on Waves they can make the airdrops on this Blockchain.

After any user can swap the coin with ethereum Blockchain if they want to.

## FASTEST BLOCKCHAIN

Waves was claimed as the "fastest decentralized blockchain" platform in the world in a Forbes article.

That's a claim I really can't independently verify because Waves Block Explorers like <http://wavesexplorer.com/> and <http://wavesgo.com/> needs a manual refresh. While Bitshare's Cryptofresh Block Explorer refreshes at an almost real-time rate.

So independently I can verify that Bitshares is currently the fastest cryptocurrency to date.

Even the data provided by Forbes looks sketchy which included a coin ranked below the 200 ranks like HEAT which I only found out after a google search. Took me some time because most result was on the late actor Heath Ledger.

### ***"Decentralization and Transparency"***

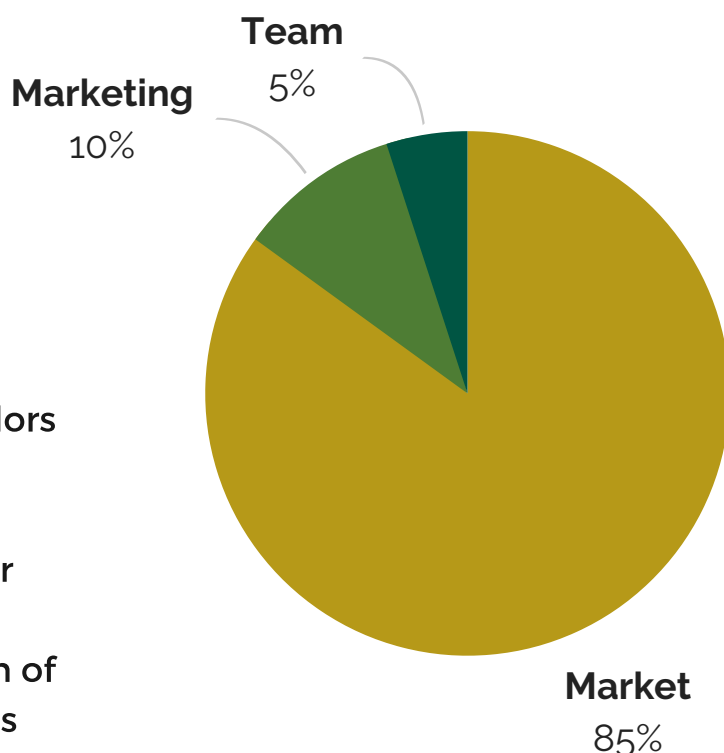

# DISTRIBUTION OF TOKENS

UNIVERSSO has a maximum offer of 100,000,000 tokens. They will not be created anymore; they have a limited amount.

85% of this offer will be available to investors and Holders in Exchanges.

A 5% will be distributed among developers, creators, partners, counselors and initial investors of the project.

The remaining 10% will be reserved for marketing and promotion actions, payment of main exchanges, provision of the legal department and negotiations with future collaborators.

## CONTACT & DISSEMINATION

### UNIVERSO

You can get in touch with us through the official channels.

Mail, Twitter, telegram, and Discordapp, are at your disposal for your queries and needs.

### COMMUNITY

Through our Twitter, Telegram and Discordapp channels, you can be informed of the latest news and events that THOR is launching.
